## About Us

TTG International LTD (TTG Int.) is a leading global provider of proactive, customer-centric service assurance OSS software solutions for the telecommunications industry.

Founded in 2001, the company experienced exceptional growth due to its innovative approach to 2G, 3G, LTE, and 5G technologies, NGNs, and fixed networks. TTG Int.'s expertise in these technologies has allowed it to develop vendor agnostic OSS tools such as

- Vendor agnostic, total-network performance management,
- AI/ML based anomaly detection for various telco-data trends,
- Inventory and configuration management solutions,
- Service quality subscriber experience monitoring and management

for a breadth of network technologies such as: 2G, 3G, 4G, 5G, WCDMA, PDH/SDH, and IP/MPLS networks.

Our software team, has embedded their extensive fixed and mobile telecommunications experience in these robust solutions, addressing the needs of the telecoms from the operator's own perspective and OSS excellence requirements.

Corporate Strategy & Philosophy

Excellence in OSS

Architect to *excel*: Our product offerings are architected to meet the evolving and future needs of telecoms companies, while we explore opportunities for joint development, partnerships, and other commercial arrangements to extend the scope of our offerings.

Continuous improvement to *excel*: To ensure that we continue to provide high-quality solution and services, we regularly review our offerings through internal and external quality audits that are based on rigorous processes and criteria.

Partner to *excel*: With global supplier agreements in place with multiple clients, we are committed to maintain our position as the leader in the telecom and IT industry through organic growth, strategic partnerships, and targeted acquisitions.

Markets

TTG Int. specializes in providing OSS solutions to the telecoms (particularly mobile) and IT industries. However, our broadband and wireless local loop applications are also being rigorously used by fix line operators.
Our clients include mobile and fixed line operators as well as telecom hardware/software suppliers, regulatory authorities and agencies.

As a founding member of HTK (Communication Technologies Cluster) we play a key role in the end-to-end National 5G Network Project, supported by BTK (the Telecom regulatory Authority in Turkey) . Specifically, TTG Int. is providing EMS (Element Management System) and SQM (Service Quality Management) modules of the project mentioned.

Vision

To be a leading provider of innovative OSS solutions for the telecom industry, empowering our customers to achieve maximum value for their business through advanced technology and exceptional customer service.

Mission

At TTG Int. Ltd., our mission is to consistently deliver the highest quality OSS solutions and services to our customers. We strive to understand and meet the unique challenges and needs of our clients, and to use our expertise and innovation to help them achieve success. We are committed to excellence in everything we do, and to building long-term partnerships with our customers based on trust and mutual benefit.

Development Strategy

We have been there …

With our experienced in-depth telecom background, TTG Int. Ltd. is dedicated to provide innovative, high-quality OSS solutions and services. We prioritize customer satisfaction above anything and helping *them* to meet their own challenges became our foundation of success. With our focus on efficiency and continuous improvement, we strive to deliver end-to-end OSS solutions enabling our customers in maximizing *their* business values.
